The above lettering represents the initials for the subsidiary roads that Southern Railway acquired. This lettering was applied to steam passenger & freight locomotives previously operated by those roads. Both Southern Drawings SL-1050 and SL-6129, Painting & Lettering of Freight & Passenger locomotives respectively, show this lettering, when applicable, was applied to the tender, upper forward corner and to the engine cab in the upper forward corner just forward of the window on both sides. See drawings SL-1050 and SL-6129. The lettering was 3 inches tall. The above graphics are not to any particular model scale, but are dimensionally correct, and thus can be resized to any scale as long as dimensions are maintained. I will provide this lettering in my DECAL artwork for N, HO, S & O Scale.
